

Federal Energy Management Program

Federal Fleet Files — February 2011

Highlighting the latest news and developments affecting Federal fleets

In This Issue:

- Call for Technical Assistance
- Reminder: Annual Fleet Compliance Reports Due February 15
- Federal Fleet Performance Summaries
- Alternative Fuel Finder: 41 Publicly Accessible Stations Added Since January 2011

How do you like our new format? Tell us by e-mailing Ryan Daley at ryan.daley@nrel.gov.

Call for Technical Assistance

The Federal Energy Management Program (FEMP) is issuing a call for Technical Assistance in the area of Federal Fleet Management. FEMP is seeking applications for which technical assistance will ideally lead to project implementation, therefore helping meet Federal petroleum reduction goals. Only projects that provide purely technical assistance will be selected. Project areas that will be considered include (but are not limited to):

- Inventory analysis
- Optimum acquisition plans
- Alternative fuel use plans
- Right sizing
- Driver behavioral change.

Funding cannot be used for equipment, hardware, or infrastructure (i.e., capital purchases).

This call will be used to provide agencies with technical assistance for **fleet management**. Agencies are encouraged to submit requests to FEMP with a sense of urgency and applications will be evaluated every month until funds are expended. Funding for successful applicants will not be transferred to agencies, rather the assistance will be provided directly by U.S. Department of Energy (DOE) national laboratories and contractors.

Agencies interested in requesting technical assistance from FEMP must apply online through the FEMP Central website by close of business March 11, 2011. Please contact the database manager supporting FEMP, Rosemarie Field, at 703-748-8611 or rosemarie.field@ppc.com to set up a FEMP Central username and password.

More information about this opportunity can be found on the FEMP website at www.femp.energy.gov/services/pa_callforprojects.html.

Reminder: Annual Fleet Compliance Reports Due February 15

Federal agencies are required to provide Congress with an annual written compliance report on fleet management for the previous fiscal year. Using data collected at the beginning of each fiscal year in the Federal Automotive Statistical Tool (FAST), each agency must submit an annual report describing its compliance with Federal fleet requirements within Energy Policy Act (EPAct) 1992 and 2005 mandates as well as progress made toward the fuel consumption goals outlined in Executive Order (E.O.) 13423. Each

year, an electronic copy of the report must be published on a publicly accessible website by February 15 and provided to Congress. Fleet managers should also send the Web address of their report to DOE via federal_fleets@ee.doe.gov for publication on the FEMP website at www.femp.energy.gov/regulations/fleet_reports.html. This link should be sent to DOE by the end of February each year.

Federal Fleet Performance Summaries

FEMP recently compiled summaries of each agency's fleet performance in Fiscal Year 2010. These summaries are based largely on FAST data submitted for FY 2010, but also include data on Energy Independence and Security Act (EISA) of 2007 Section 246 and EPCA 2005 Section 701. FEMP created these documents to serve as "off the shelf" references, to aid with no-notice queries from management or the public, and to provide a single point of reference covering performance under all statutory and executive order mandates.

Annual performance summaries include the following data for each agency:

- Transportation Management Scorecard
- Fleet acquisitions
- Fleet inventory
- EPCA 2005 Section 701 waiver data results
- Fleet petroleum-based fuel use
- Fleet alternative fuel use
- Fueling centers
- Summary fleet data

Agencies wishing to obtain a copy of their reports should contact Amanda Sahl at DOE at amanda.sahl@ee.doe.gov, or Ryan Daley at the National Renewable Energy Laboratory (NREL) at ryan.daley@nrel.gov.

Alternative Fuel Finder: 41 Publicly Accessible Stations Added Since January 2011

See the alternative fuel finder table on page 3 for details on one biodiesel station, one CNG station, 15 E85 stations, and 24 electric vehicle supply equipment (EVSE) stations added in 20 states since the January 2011 edition of Federal Fleet Files.

Federal Fleet Files Contact and Subscriptions

Federal Energy Management Program

February 2011 Alternative Fuel Finder Table

NREL maintains a database of alternative fueling stations nationwide through the Alternative Fuels and Advanced Vehicles Data Center (AFDC). The table below shows one biodiesel station, one CNG station, 15 E85 stations, and 24 electric vehicle supply equipment (EVSE) stations added in 20 states since the January 2011 edition of Federal Fleet Files. Unless otherwise noted, only open, publicly accessible stations are included. Electric vehicle supply equipment stations are included to prepare agencies for incorporating electric vehicles into fleets. Check the AFDC Alternative Fueling Station Locator for up-to-date information at www.afdc.energy.gov/afdc/locator/stations/.

¹ Indicates that a station accepts Wright Express (W) and/or Voyager (V) fleet payment cards; fleet payment card acceptance is unknown for electric charging stations.

² Number of EPO 2005 Section 701 waived vehicles within five miles of the station; information not applicable for biodiesel.

³ Federal agencies with EPO 2005 Section 701 waived vehicles within five miles of the station; information not applicable for biodiesel.
